ITS projekt 2 - REPORT

Dávid Oravec (xorave05)

2. mája 2020

1 Neimplementované testy

Nasledujúce testy boli odovzdané v 1. úlohe, ale neboli implementované.

1.1 cart.feature

```
Scenario: Product is added to non−empty cart
Given User is on exact page
And Cart has at least one item
When User adds item to cart
Then Cart contains one more item

Scenario: Show items in cart
Given User is on exact page
When User clicks on "Shopping cart"
Then Items in cart are displayed
```

1.2 userthings.feature

```
Scenario: User logs out
Given User is on any page of eshop
And is logged in
When User logs out
Then user is logged out

Scenario: Successful password change
Given User is on MyAccount page
And is logged in
When user navigates to Change password page
And fills new password
And passwords are same
And clicks "continue"
Then password is changed

Scenario: Unsuccessful password change
Given User is on MyAccount page
And is logged in
When user navigates to Change password page
And fills new password
And passwords are not same
And clicks "continue"
Then password is not changed
```

2 Oprava testov

Niektoré testy z pôvodného návrhu boli modifikované z dôvodu lepšej implementácie a použiteľnosti. Nejednalo sa o chyby testov, išlo o zjednodušenie krokov a ich implementáciu. Pridané/zmenené prerekvizity sú vyznačené hrubým písmom alebo preškrtnuté pokiaľ boli úplne odstránené.

2.1 cart.feature

```
Scenario: Product is added to empty cart
Given User is on exact product page
And Cart is empty
When User adds item to cart
Then Cart contains one more item

Scenario: Continue shopping from empty cart
Given User is on cart page
And Cart is empty
When User clicks "Continue"
Then Main page is loaded
```

2.2 mainpage.feature

```
Scenario: Newsletter subscription
Given user is on any eshop page
And user is logged in
When user clicks on "Newsletter"
And user selects "Yes" option
And user clicks "Continue"
Then user has newsletter subscription

Scenario: Wish list
Given user is on any eshop page
And user is logged in
When clicks on "Wish list"
Then user wish list is shown
```

2.3 userthings.feature

```
Scenario: View order history
Given User is logged in
And user is on any page of eshop eshop page
When user clicks "MyAccount"
And clicks "Order history"
Then history of order is shown
```
